University with a Difference

A college management system is a software application that automates the entire process of managing a college. It can handle different aspects of the college, such as sign up/login, student records, course records, faculty records, and more.

Talking approximately the system, it includes all of the required features which consist of adding, viewing, deleting, updating, searching.

Functionalities

LJ University
University with a Difference

Admin:

- Admin can manage only his/her, all student, faculty and course details.

Faculty:

- Faculty can manage only his/her, all student, & course details.

Student:

- Student can manage only his/her details, search course name, & see all courses.

Course:

- Only admin & faculty can manage course and student can only see details.

Advantages

- Manual Data Entry
- Inefficient Admissions Process
- Poor Communication
- Limited Data Analysis
